Sprint planning – Sprint 1

Planned Start Date: 29/09

Real Start Date: 02/10

Planned End Date: 26/10

Real End Date: 26/10

SPRINT BACKLOG		
Number of stories	15	
Number of bugs	1	
Number of tasks	40	
Number of Management Tasks (Scrum)	3	
Number of team members	Planned: 4	Actual: 5
Total planned estimation vs execution	Planned hours: 105 Executed hours: 193.5	

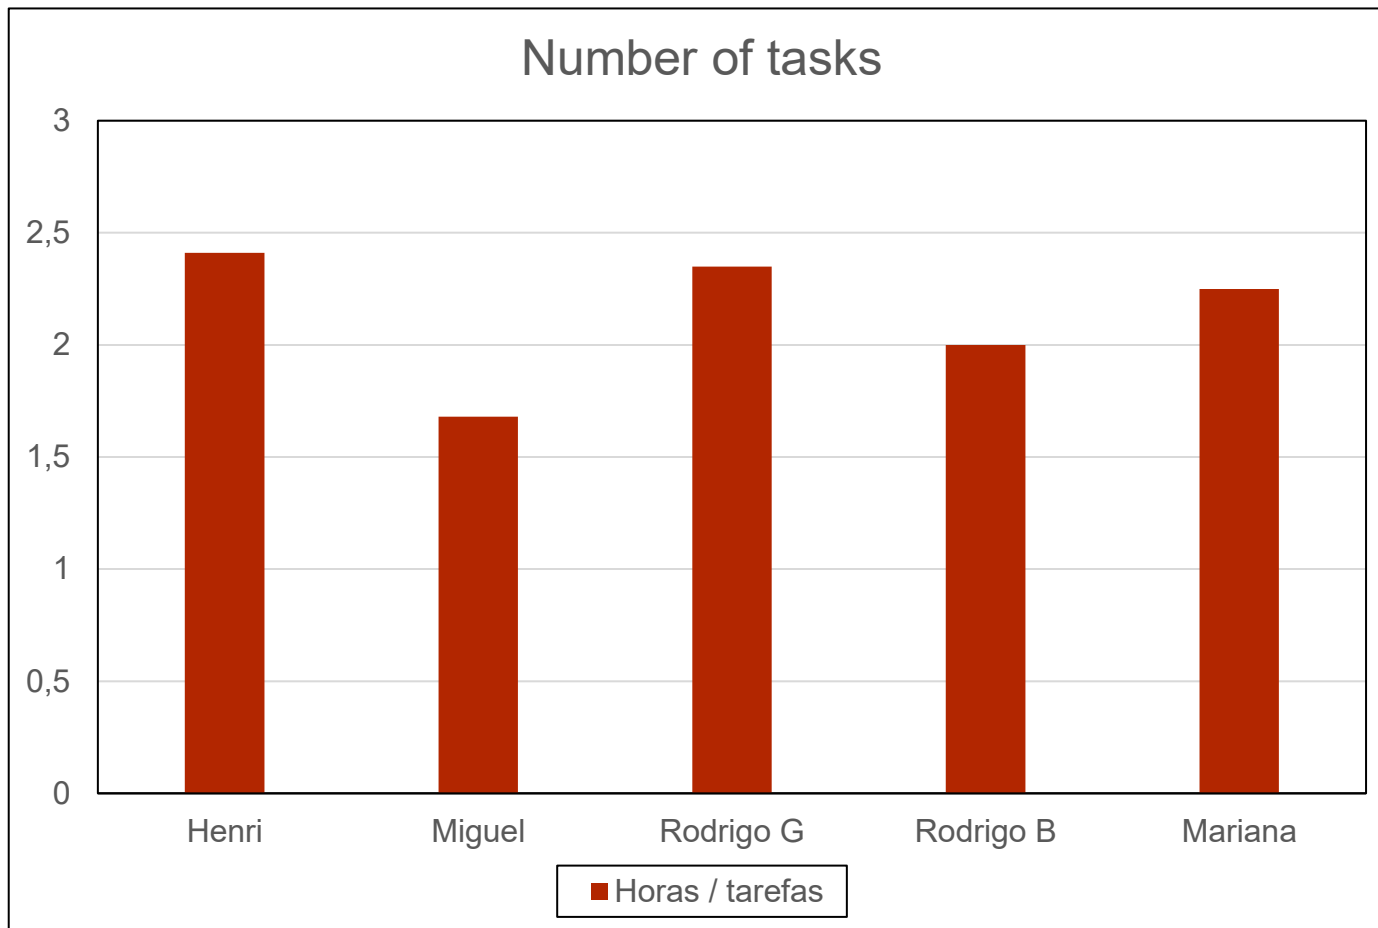

Sprint 1 planning

Assigned User Stories (as stated in the project assignment)	Committed? Yes / No (according to team planning)	Todo	Doing	Testing	Done	Blocked
USBD01	Yes		X			
USBD02	Yes				X	
USBD03	Yes				X	
USBD04	Yes				X	
USBD07	Yes				X	
USBD12	Yes				X	
USBD18	Yes				X	
USEI01	Yes				X	
USEI02	Yes				X	
USEI03	Yes				X	

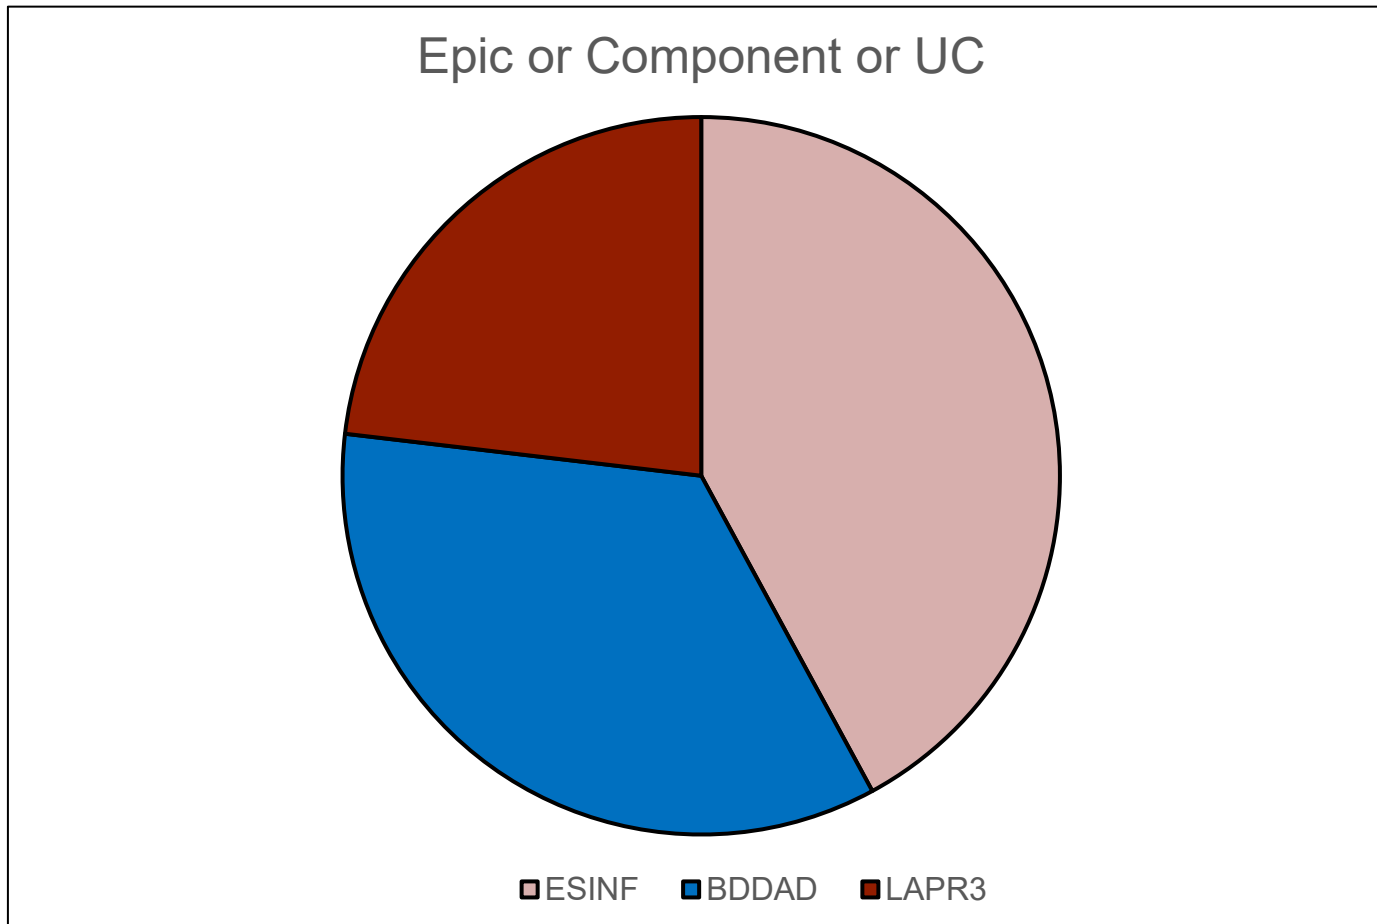

Sprint 1 planning

Assigned User Stories (as stated in the project assignment)	Committed? Yes / No (according to team planning)	Todo	Doing	Testing	Done	Blocked
USEI04	Yes				X	
USEI05	Yes				X	
USLP01	Yes		X			
USLP02	Yes				X	
USLP03	Yes				X	

Work assigned by team member

Work assigned by type (componente)

Issues / Assumptions / unanswered questions

Description	Responsible	Date / sprint	Related issue / item in Git
The functionality "Check Orders", related to the USEI02, is giving different results: if you run the functionality normally as you should, it gives you the right numbers. If you run it again after running the functionality "Load and Organize Warehouse", related to the USEI01, it gives you a different result, with most of the order lines as "ELIGIBLE", which is wrong. (ALREADY FIXED!)	Henri Fontes and Miguel Ribeiro	21/10	#60

Daily Meetings

Date (of the meeting)	Place / duration	Henri Fontes	Miguel Ribeiro	Rodrigo Guimarães	Rodrigo Barbosa	Mariana Sousa
02/10/25	LAPR3 class / 20 min	X	X	X	X	X
03/10/25	BDDAD class / 10 min	X	X	X		
07/10/25	ISEP / 15 min	X	X	X	X	X
08/10/25	LAPR3 class / 60 min	X	X	X	X	
09/10/25	LAPR3 class / 40 min	X	X	X	X	
10/10/25	BDDAD class / 30 min	X	X	X		
15/10/25	LAPR3 class / 60 min	X	X	X	X	X
16/10/25	LAPR3 class / 30 min	X	X	X	X	X

Daily Meetings

Date (of the meeting)	Place / duration	Henri Fontes	Miguel Ribeiro	Rodrigo Guimarães	Rodrigo Barbosa	Mariana Sousa
17/10/25	ISEP / 30 min	X	X		X	X
20/10/25	ISEP / 30 min	X	X	X	X	X

22/10/25	LAPR3 class / 60 min	X	X	X	X	X
23/10/25	ISEP / 30 min	X	X	X	X	X
24/10/25	ISEP / 30 min	X	X	X	X	X

LLM performance assessment (use ChatGPT or Copilot)

Source file (attach the file you have used):

- We haven't used a file. We've sent for Copilot our Daily Meetings in text.

Input (write down the prompt you used to ask for the performance assessment):

"I will send all the daily meetings that me and my team have done in this sprint. Now, make an individual comment about the performance for everyone based on the points of the meetings and, finally, give an individual grade (0-5) and then a grade for the team, giving a retrospect."

LLM performance assessment - Output

Output file (attach the complete file extracted from the A.I. tool):

Output (write one line per team member):

Henri Fontes: Organized and collaborative leader who ensured strong coordination and team support.

Rodrigo Guimarães: Consistent and dedicated, showed clear growth in database design and modelling.

Rodrigo Barbosa: Technical and structured, stood out for his UML modelling and disciplined development.

Miguel Ribeiro: The most productive member, demonstrating strong technical mastery and excellent pace.

Mariana Sousa: Analytical and precise, contributed thoughtful solutions and effective integration.

Team Members' Opinion about the A.I. output:

Henri Fontes: I liked the AI output but I don't fully agree with it because I think the Daily Meetings themselves are not enough for an evaluation over the performance of the team members, because they don't embrace the details of the reality of the day-to-day work.

Rodrigo Guimarães: I can somewhat agree with the AI's output, but it isn't entirely precise, as the comments are often not detailed enough for a fair evaluation and don't always reflect the actual work, sometimes sounding a bit too soft.

Rodrigo Barbosa: I appreciate the AI's feedback and find it encouraging. However, it feels a bit exaggerated. I don't think I contributed that much.

Miguel Ribeiro: I appreciated the AI's output, but I don't completely agree with it. In my view, Daily Meetings alone aren't sufficient to evaluate team members' performance, as they don't capture the full complexity and nuances of day-to-day work.

Mariana Sousa: I agree with the AI's output text, but not with the grade it gave me. It should be a bit lower because of my late commits, even though I had some dependencies.

Sprint Retrospective

Date: 27/10/2025

What went well?

- We kept a good level of organization and communication in this Sprint, which led us to finish our work with plenty of time left for the delivery and with peace of mind.

What went wrong?

- Nothing went wrong in this Sprint. We of course had our issues and bugs that were happening sometimes, which is normal in projects like this, but in the end, everything was fixed and corrected.

What we learned?

- To organize our Board better, that allows a better understanding and overview of the project for the team members.
- To report everything that happens in our work sessions in the Daily Meetings, which makes us monitor our processes more closely.

Sprint Retrospective

Date: 27/10/2025

Action items:

For this next Sprint, we'll be maintaining our communication, work ethic and rhythm so the project keeps running fluid and effectively.

Overall Project performance:

- **Comments:** Our group worked in an organized manner, and we also kept great communication in this Sprint. We had a balanced collaboration, where each member contributed effectively to their user stories, supported one another when facing difficulties, and ensured consistent progress toward the project goals.
- **LLM evaluation:** “This sprint shows a strong, communicative, and technically competent team. Everyone contributed meaningfully, collaboration was clear in meetings, and GitHub metrics confirm balanced engagement. There was a healthy escalation of effort near the sprint’s end, showing adaptability and commitment to delivery. The team overcame early conceptual and dependency issues effectively. The board organization, code structure, and testing improvements are evidence of maturing agile practices.”
- **How do you grade your performance (0-5):**
 - Henri: 4
 - Miguel: 4
 - Rodrigo G.: 4
 - Rodrigo B.: 4
 - Mariana: 4
- **How do you grade your results (0-5):**
 - Henri: 4
 - Miguel: 4
 - Rodrigo G.: 4
 - Rodrigo B.: 4
 - Mariana: 4
